News You Can Use

Don't Have A Clue About HP2?

HP2 is a clinically integrated network (CIN) of physicians and other providers committed to working collaboratively to improve clinical quality and outcomes at the lowest possible cost. The HP2 network currently includes Northeast Georgia Medical Center, Northeast Georgia Physicians Group, The Heart Center, Longstreet Clinic and Northeast Georgia Diagnostic Clinic. HP2 is actively expanding the network for qualified providers.

To learn more about the criteria to join HP2, please visit www.healthpartnersnetwork.com. For any questions you may have, please contact the Health Partners Business Development Manager, Sandy.King@nghs.com or by phone at 770.219.9095.

ACO Medicare Shared Savings Program (MSSP)

What is an ACO/MSSP?

Accountable Care Organizations (ACOs) are groups of doctors, hospitals, and other health care providers who come together voluntarily, agreeing to be accountable for the quality, cost, and overall care of assigned Medicare patients. Working together to better coordinate care, sharing information, and keeping patients healthy may result in shared savings.

Coordinated care will ensure that patients, especially the chronically ill, get the right care at the right time, while avoiding unnecessary duplication of services. Care coordination across the continuum results in improved efficiency and better outcomes, reducing the fragmented care that often results from a Fee-For-Service payment system.

When an ACO succeeds both in delivering high-quality care and spending health care dollars more wisely, it will share in the savings it achieves for the Medicare program.

Shared Savings Goals

-  **Better care for patients**
-  **Better health for our communities**
-  **Lower Medicare Fee-for-Service costs through improvements for the health care system**

A Medicare ACO is a patient-centered organization where the patient and providers are true partners in care decisions.

A group of providers and hospitals within Northeast Georgia Health Partners HP2 were approved to participate in the Centers for Medicare and Medicaid (CMS) MSSP program as an ACO. The HP2 ACO has been assigned more than 20,000 beneficiaries who primarily live in Hall County. Wanda Katich, Executive Director of Health Partners Operations and Program Development, states "This ACO partnership is the next step in today's healthcare transformation to value-based care, and it will help us reach our goal of improving the health in our community and region."

Annual Wellness Visits

The Annual Wellness Visit is a great opportunity for providers to address preventive health measures for their Medicare patients.

Preventive Health measures include flu and pneumonia immunization status, as well as screenings for BMI, tobacco use, risk for depression, risk for falls, and breast and colon cancer risk. When needs are identified, appropriate interventions and implementation of a follow up plan greatly benefit the patient's quality of life.

Don't Lose your Medicare Annual Wellness Visit Opportunities!

We want you to know about a trend of outside companies marketing 'quick access' to Medicare beneficiaries to perform their Annual Wellness Visits (AWV). This service is being offered through retail clinics inside local pharmacies.

The AWV focuses on health prevention, early detection of disease, and fosters improved health and continuity of care for the patient. As you know, these visits are also important to the patient's primary care provider, as this is when health updates are documented in the medical record. This documentation is necessary for capturing risk coding and for meeting quality of care measures.

When the beneficiary chooses the outside clinic to perform the AWV and subsequently sees their PCP, reimbursement for the AWV is denied for the PCP since the service has already been rendered to the patient by the retail clinic.

Be mindful to ensure that all Medicare beneficiaries are scheduled with their PCP for their AWV. And make sure to educate them on the benefits of seeing their PCP regularly!

Alliant Modifier Update: Assistant Surgeon

Effective 1/1/2018, Alliant now allows a surgeon to submit under his name with a modifier AS, for the assistant surgeon if he/she is a physician assistant, nurse practitioner, or a clinical nurse specialist.

- If a claim is received with an AS modifier and the submitting provider is the same as the surgeon, the claim can be allowed and not denied as a duplicate.
- If the claim is received with an 80, 81 or 82 modifier and the submitting provider is the same as the surgeon, the claim **WILL DENY** as a duplicate.

Please Remember!

Health Partners requests that your office notify us in writing prior to the effective date of any changes that occur with your providers or practice. Please fax updates to Nicole Drake at 770.219.6609, or email NicoleDrake@nghs.com.
